omercanaydemir1@gmail.com

Istanbul, Turkey 34899

## PROFILE INFO

Talented full stack developer +2.5 years experience working with modern tools and technologies. I have experience and core projects for cross-platform mobile applications (React-Native), e-commerce websites, REST API services (Django), some applications for customer requests (PySimpleGUI). Besides that, I also built some components and fixed critical bugs in the React and Flask frameworks. Of course, while working with these frameworks I also used several tools, popular technologies and web services (AWS). Based on these experiences, I think it's time to discover new areas.

## SKILLS

Python

JavaScript

Django

React/React Native

Linux

PostgreSQL

DynamoDB

Amazon Web Services

## LANGUAGES

Turkish: Native Speaker

English: Proficient

## CERTIFICATES

Python Programming

8 Oct 2020

Roboting Coding With Python

15 Mar 2020
